

How to properly separate and dispose of recyclable resources and garbage (April 2010) Revision

Tochigi City has reviewed the waste collection system, and revised how to separate and dispose of waste.

Please read below carefully, and place the garbage properly.

記

| Item | Before the change | After the change |
|---------------------------------------|---------------------|---------------------------------------|
| Used small domestic appliances | Incombustible waste | Used small domestic appliances |
| Collection start time | 8:00 a.m. | 8:30 a.m. |

○ Note

- Small domestic appliances are the products with a size of less than 60 centimeters, which need electricity and batteries to work, such as an electric fan or vacuum-cleaner. Put the garbage in a transparent or semi-transparent bag with your name and the neighborhood association's name (or your address) on, and place it at the garbage collection site.

Following items cannot be disposed of at the regular collection site.

Kerosene heater, products containing Fluorocarbons or 4 domestic appliances (TV sets, air conditioner, refrigerator and washing machine)

Please dispose of items that contain personal information, such as cellular phones, directly to the collection box installed at the City Hall or each branch office. If your personal computer or other item is too big to be put in the collection box, please contact the manufacturer.

○ Please contact us below for any inquiries about waste disposal.
